To the courteous Reader.

IN all civill and well ordered Common-weathes, even where best Schooles of Learning, and famous Universities are, you shall finde published not onely methodicall discourses concerning the curation of infirmities of the body of man; but Treatises also containing payable medicaments, which any one who is endued but with a meane judgement, may apply to himselfe, whereas neither Physician nor Apothecarie can bee had.

Great plenty of such Bookes are published in the German tongue: for the Germans delight in uttering of Pamphlets, promising the revelation of secrets in Physick, which prove nothing else but triviall toyes. England *in like manner is reasonably well stored with such stuffe, which emboldeneth no small number of bold Knaves, and impudent Queanes to meddle with the Practise of Physick, to the utter ruine of no small number of rude and improvident persons, who commit themselves to the Skill and Cure of such unworthy persons. That this is a truth, the manifold complaints which come to the Physicians Colledge when the Fellowes sit doe make good. So that it might*

seeme

seeme requisite rather to suppresse most of these Treatises, then to publish any more of this kinde. But this Booke may bee priviledged to come abroad, if you either respect the method or matter. The Remedies may easily be found out, the Diseases being set downe Alphabetically. The Remedies are not to be rejected; but, seeme to have beene set downe by one who was no Stranger in the Practice of Physick. The Printer having beene enformed of so much, was not willing to keepe the Treatise within its private walls; but to Print some Copies of it, and to present them to the publick view and censure. Hee onely desireth that his good intention, and purpose to further the pub-

lick good, may be taken in good part of those who have not too censuring Spirits. If he shall finde thy favourable acceptance of this Treatise, hee will not spare to publish Bookes of the like Subject come to his hands, if they shall bee thought worthy of the Presse.

25 March 1639.

ALEXANDER READ
Doctor of Physick.

A brief discourse of the Colours and Judgements of Urines.

URine fat and troubled, betokens a burning fever of Choler, or red and thick all over with a black circle, sheweth sickneſſe all over the body.

Urine white and thin little in quantity sheweth cold in the body.

Urine cleer with a black circle, sheweth the sick hath the Ptisick.

Urine red and thin with a bright circle, sheweth a bad Stomack.

Urine thin and greenish above shews a cold complexion, if blue in casting 'tis the Ptisick.

Urine thin if it shew black above betokens great losse of Nature.

Urine thick and troubled horspisse signifieth head-ache.

Urine fat in the bottome, white in the middest, and red above, shews the Fever quartan.

Urine fat like flesh with dregs in the bottome like shadowing, shews the Dropsie of Cold, but if it be whey above, cleere in the

the middeſt, and ſhadowing beneath ſheweth a hot dropſie.

Urine with black dregs in the bottome like gobbets of coals ſheweth wormes.

Urine with black contents as Mothes in the midſt ſhews an Impoſtume under the ſide.

Urine with contents like ſhavings of Parchment, in the bottome ſheweth ſtopping of the Reines and Pipes of the Liver.

Urine black and green with long white Contents ſignifies the Palſie.

Urine that hath grains under the circle, ſheweth the ſtomack is full of wormes, and alſo burning of the heart.

Urine fowle above ſheweth heate in the Heart, Lungs, and Spleen.

Urine with black contents in the bottom ſheweth Coſtiveneſſe.

Urine that is long laſting, betokens byting in the body and great Rheume.

Urine thick, little in quantity, and high coloured, ſheweth great burning in the body.

Urine frothy, cleer and a little red, ſhews pain under the right ſide.

Urine frothy ſheweth winde and pain under the left ſide.

Urine very red ſheweth an Impoſtume on the Liver.

Urine as red as burn'd gold if it be Hydroptick betokens death.

Urine in a hot Fever, one part red, another black, another green, another blue ſignifieth death.

Urine in hot axis black and little in quantity and ſtinking betokens death.

Urine all coloured as lead, ſheweth a prolonging of death.

Urine darke and cleere beneath ſignifies death.

Urine that ſhineth raw and bright, if the ſcum in the bottom ſhines not, ſhews death

Urine thin in ſubſtance fleeting above like a darke skie ſhews death.

Urine dirty, ſtinking and a dark skie ſhews prolonging of death.

Urine like water with a dark skie in a fever ſheweth death.

Urine with dregs in the bottome mingled like bloud, ſheweth death.

Urine black and thin, if the ſick do loath hen he goes to the ſtool, and ſpeaks overwart, or underſtands not aright, if his ſickneſſe goeth not from him, ſignifieth death.

Womens Urines, their signification.

URine white, heavy and stinking, shews pain in the Reins, and Mother and Cold.

Urine that fleeteth fat above, shews pain in the Reins of the back.

Urine with black contents in the bottome, shews falling of Flowers.

Urine with white contents in the bottome, shews much falling of Flowers.

Urine coloured as Lindseed, shews death if she have the Flux.

Urine red as gold with a watery circle above, shews she is with childe: mark if you see your face in a womans water, if shee be without a Fever, she is with Childe.

Urine of a woman with childe shall have some cleer stroaks, the most part is troubled in a reddish manner of a Tawny, this token never fails as soon as the Childe hath life, if it be a Girle, the troublesomnesse will draw down-

downward; if a Boy, the troublesomenesse will be above, this fails not.

Urine bright as gold shews lust, or desire to marry.

Urine coloured as white Lead, if shee be with Childe, sheweth the Childe is dead within her, if she be not with Childe, and the urine stink and coloured as Lead, sheweth the Mother is rotten.

A rule to know the danger in falling sick, by the Diary judgement of the Moon.

1 IN *primis*, he that falleth sick on the first day of the Moon, shall soon die if the sickneſſe be tedious or fierce.

2 Although hee be sore sick, hee shall be cured.

3 He may with due regard in Physick be cured.

4 He shall be soon restored to health.

5 He shall be sick but ten dayes, and then restored.

6 He is in no danger.

7 He shall enjoy life but three moneths.

8 Hee shall continue sick and languish a long time.

9 He shall have health after nine dayes.

10 He shall amend after ten dayes.

11 Hee shall be long sick, but at last recover.

12 He shall be sick xij days, and recover.

13 He

13 He shall have a long and grievous sickneſſe.
14 He shall be soon restored.
15 He shall eatily escape death.
16 He shall be in great danger, if hee take the open ayre.
17 He shall not prevaile with any Physick to do him good.
18.19.20. Be good dayes.
21. Sickneſſe is mortall and incurable.
22 He shall escape after he hath layn three moneths.
23 He shall die in few dayes.
24 He shall remayn a long time sick.
25.26.27.28.29. Be all good dayes.
30 He shall hardly escape with many Medicines.

To

To know the Humour that causeth the sickneſſe by the Patients Spittle.

IN *primis*, if the Spittle be white viſcous, the ſickneſſe comes of phlegme.

If black and clammy or like Lead, the ſickneſſe is of Melancholy.

If Cytron, yellowiſh or Glaſſie, it commeth of Choler.

If tawny or reddiſh mattery colour it comes of Bloud.

If the white Spittle be not knotty, it ſignifies health.

If ſumy or frothy, it ſignifies winde, and a raw ſtomack and cold.

If gleary like horne, it ſhews a ſtomack ſlack, raw, and ſlow of digeſture.

A judgement of the ſtate of Mans ſickneſſe by the Pulſe.

LAy your foure fingers on the Pulſe, then marke which finger the Pulſe is moſt ſtrongly under, if the pulſe under the little be feeble and weak, and ſo under every finger to the heart upward be more weak, it ſignifieth death.

Contrariwiſe, if under the little finger it be ſmite ſtrong and under the Ring-finger ſtronger, the middle finger more ſtrong, and under the foreſinger next the heart ſtrongeſt of all, it is a good ſigne and prognoſticateth health.

FINIS.

That every one may know how to compound ese Medicines, without the help of any other an, therefore the notes of all the weights hich are used among the Apothecaries, are laced underneath.
